

Stack Lift MOHR LW 450-2

Ergonomic working
at a user-friendly working height

Description Stack Lift LW 450-2

The MOHR Stacklift LW 450-2 is predominantly employed for handling print format class 50 x 70 l 28". Since the material to be cut is lifted automatically, the operator loads the material directly into the cutting machine at ergonomic height. The lift can also be used for stacking the material. In this case the lift is lowered semi-automatically. This means that the procedure is started manually, but stopped automatically by the light barrier. As it is not necessary to anchor MOHR Stacklifts to the floor they can be easily rearranged.

Technical Data

Pallet size, max	600 x 860 mm
Size of platform	620 x 900 mm
Stroke, max	850 mm
Carrying capacity max	450 kg

Customer benefits

- ▄ Increases the efficiency of the cutting machine by up to 10%, because working height remains constant throughout loading and unloading procedures
- ▄ Lifting heavy loads is reduced to a minimum
- ▄ Operator's productivity curve remains constant
- ▄ Substantial reduction of occupational diseases
